BRAHMAN: THE BREED THAT DELIVERS VALUE AT EVERY STAGE

PERFORMANCE. PROFITABILITY. PROVEN REULTS.

When it comes to feeder and feedlot cattle, Brahman genetics stand out. Data collected in the Texas A&M Ranch to Rail Program proved that Brahman cross feeders gain and grade and make as much profit as their non-Brahman counterparts when fed and harvested side by side.

Brahman and Brahman cross cattle are known for their hybrid vigor, efficiency, adaptability, and ability to thrive in diverse environments.

Invest in a breed that drives success, from the ranch to the feedlot to the plate.

Brahman Feeder Cattle Perform on Foot and The Rail

Efficiency: Gan more with less feed. Brahman feeder Cattle are proven to excel in feed conversion.

Durability: Built to handle heat, stress, and harsh conditions, making them ideal for adapting to environments where they perform and gain creating value.

Marketability: Brahman crosses are well muscled, high cutability and deposit intramuscular fat to create a high value high lean yielding carcass in a quality grid world!
